

- Easy to use touch screen interface
- State of the art system w/digital instrumentation
- Real-time test measurement displays
- Digital pump speed controls
- Configurable safety cut-off limits for test parameters
- Digital data recording and reporting via USB
- Test ready flow configuration
- Flexible calibration options for onboard instruments
- Plug-n-play instrumentation. No programing required
- User adjustable test pressure relief valve
- Lockable caster wheels

HTS^{LP}

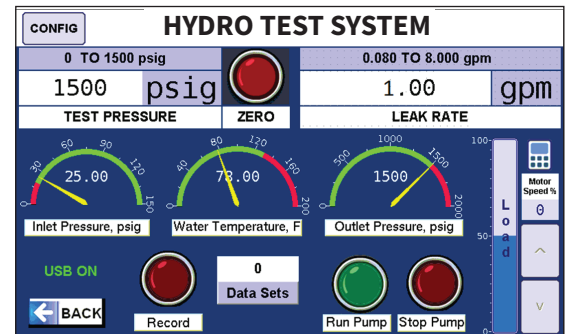

Hydro Testing System, Low Pressure

Reduce set-up time | Ease of Use | Accurate Results

The HTS-LP is an easy to use & portable hydro & water leak rate test system.

Designed around the user to ensure reduced set-up times.

Typical Specifications

Power	120 VAC Max. 15A	
Pressure	Max Test Pressure: 130psig	Accuracy: $\pm 0.5\%$ of Full Scale
Flow	Range: 0.01 to 1 gpm	Accuracy: $\pm 0.25\%$ of Full Scale
Weight	275 lb
